

- Get some styrofoam and put it in the gas, until the gas won't eat anymore. You should have a sticky syrup.
- Put it on the end of something (don't touch it!!). The unused stuff lasts a long time!

22. How to make a fertilizer bomb by The Jolly Roger

Ingredients:

- Newspaper
- Fertilizer (the chemical kind, GREEN THUMB or ORCHO)
- Cotton
- Diesel fuel

Make a pouch out of the newspaper and put some fertilizer in it. Then put cotton on top. Soak the cotton with fuel. Then light and run like you have never ran before! This blows up 500 square feet so don't do it in an alley!!

23. Tennis Ball Bombs by The Jolly Roger

Ingredients:

- Strike anywhere matches
- A tennis ball
- A nice sharp knife
- Duct tape

Break a ton of matchheads off. Then cut a SMALL hole in the tennis ball. Stuff all of the matchheads into the ball, until you can't fit any more in. Then tape over it with duct tape. Make sure it is real nice and tight! Then, when you see a geek walking down the street, give it a good throw. He will have a blast!!

24. Diskette Bombs by The Jolly Roger

You need:

- A disk
- Scissors
- White or blue kitchen matches (they MUST be these colors!)
- Clear nail polish

1. Carefully open up the diskette (3" disks are best for this!)
2. Remove the cotton covering from the inside.
3. Scrape a lot of match powder into a bowl (use a wooden scraper, metal might spark the match powder!)
4. After you have a lot, spread it evenly on the disk.
5. Using the nail polish, spread it over the match mixture
6. Let it dry
7. Carefully put the diskette back together and use the nail polish to seal it shut on the inside (where it came apart).

When that disk is in a drive, the drive head attempts to read the disk, which causes a small fire (ENOUGH HEAT TO MELT THE DISK DRIVE AND FUCK THE HEAD UP!!). Let the fuckhead try and fix THAT!!!

25. Unlisted Phone Numbers by The Jolly Roger

There are a couple of different ways of doing this. Let's see if this one will help: Every city has one or more offices dedicated to assigning numbers to the telephone wire pairs. These offices are called DPAC offices and are available to service reps who are installing or repairing phones. To get the DPAC number, a service rep would call the customer service number for billing information in the town that the number is located in that he is trying to get the unlisted number of. (Got that?) The conversation would go something like this: "Hi, Amarillo, this is Joe from Anytown business office, I need the DPAC number for the south side of town." This info is usually passed out with no problems, so... if the first person you call doesn't have it, try another. REMEMBER, no one has ANY IDEA who the hell you are when you are talking on the phone, so you can be anyone you damn well please! When you call the DPAC number, just tell them that you need a listing for either the address that you have, or the name. DPAC DOES NOT SHOW WHETHER THE NUMBER IS LISTED OR UNLISTED!! Also, if you're going to make a habit of chasing numbers down, you might want to check into getting a criss-cross directory, which lists phone numbers by their addresses. It costs a couple hundred bucks, but it is well worth it if you have to chase more than one or two numbers down!
