

Remember: Ring - red - right. The "Three R's" -- a simple way to remember which is which. Now you must attach all the red alligator clip (Ring) to the "R" (Ring) terminal. Attach the green alligator clip (Tip) to the "T" (Tip) terminal.

Note: If instead of a dial tone you hear nothing, adjust the alligator clips so that they are not touching each other terminals. Also make sure they are firmly attached. By this time you should hear a dial tone. Dial ANI to find out the number you are using (you wouldn't want to use your own). Here are some practical applications:

- Eavesdropping
- Long distance, static free, free fone calls to phriends
- Dialing direct to Alliance Teleconferencing (also no static)
- Phucking people over
- Bothering the operator at little risk to yourself
- Blue Boxing with greatly reduced chance of getting caught
- Anything at all you want, since you are on an extension of that line

#### *Eavesdropping*

To be most effective, first attach the Beige Box then your phone. This eliminates the static caused by connecting the box, therefore reducing the potential suspicion of your victim. When eavesdropping, it is always best to be neither seen nor heard. If you hear someone dialing out, do not panic; but rather hang up, wait, and pick up the receiver again. The person will either have hung up or tried to complete their call again. If the latter is true, then listen in, and perhaps you will find information worthy of blackmail! If you would like to know who you are listening to, after dialing ANI, pull a CNA on the number.

#### *Dialing Long Distance*

This section is self explanatory, but don't forget to dial a "1" before the NPA.

#### *Dialing Direct to Alliance Teleconferencing*

Simply dial 0-700-456-1000 and you will get instructions from there. I prefer this method over PBX's, since PBX's often have poor reception and are more difficult to come by.

#### *Phucking People Over*

This is a very large topic of discussion. Just by using the other topics described, you can create a large phone bill for the person (they will not have to pay for it, but it will be a big hassle for them). In addition, since you are an extension of the person's line, you can leave your phone off the hook, and they will not be able to make or receive calls. This can be extremely nasty because no one would expect the cause of the problem.

#### *Bothering the Operator*

This is also self explanatory and can provide hours of entertainment. Simply ask her things that are offensive or you would not like traced to your line. This also corresponds to the previously described section, Phucking People Over. After all, guess who's line it gets traced to?

#### *Blue Boxing*

See a file on Blue Boxing for more details. This is an especially nice feature if you live in an ESS-equipped prefix, since the calls are, once again, not traced to your line...

#### *IV. POTENTIAL RISKS OF BEIGE BOXING*

Overuse of the Beige Box may cause suspicions within the Gestapo, and result in legal problems. Therefore, I would recommend you:

- Choose a secluded spot to do your Beige Boxing,
- Use more than one output device
- Keep a low profile (i.e., do not post under your real name on a public BBS concerning your accomplishments)

In order to make sure the enemy has not been inside your output device, I recommend you place a piece of transparent tape over the opening of your output device. Therefore, if it is opened in your absence, the tape will be displaced and you will be aware of the fact that someone has intruded on your territory.

Now, imagine the possibilities: a \$2000 dollar phone bill for that special person, 976 numbers galore, even harassing the operator at no risk to you! Think of it as walking into an enemies house, and using their phone to your heart's content.

### **9. How to make a COY bomb by the Jolly Roger**

You will have to use up the cartridge first by either shooting it or whatever. With a nail, force a hole bigger so as to allow the powder and wick to fit in easily. Fill the cartridge with black powder and pack it in there real good by tapping the bottom of the cartridge on a hard surface (I said TAP not SLAM!). Insert a fuse. I recommend a good water-proof cannon fuse, or an m-80 type fuse,
